

Locating the USB Cord on PowerSync+ Cart 20 & 40

1. To locate the USB cord in your PowerSync+ cart, begin by removing the grommet cover located on the top of the cart.

2. To locate the USB cord, look on the top of the shelf above the slots numbered 1-20.

Once the cords have been located begin to feed the USB cord through the opening in the grommet. Continue until the USB cord is through the top of the grommet.

3. Replace the grommet cover. Now the Macbook can be connected to the cart when iOS devices need to be synced.
